Profire Energy Reports Financial Results for Third Quarter 2020

LONDON, Utah November 9, 2020 - Profire Energy, Inc. (NASDAQ: PFIE), a technology company which engineers, install and services burner and combustions management solutions in the oil and gas and other industries, today reported financial results for its third quarter ending September 30, 2020. A conference call will be held on Tuesday, November 10, 2020 at 1:00 p.m. ET to discuss the results.

Third Quarter Summary

- Recognized revenue of \$4.0 million
- Realized gross profit of \$1.5 million or 38.0% of total revenues
- Net loss of \$1.1 million or (\$0.02) per share
- Cash and liquid investments of \$17.2 million and remained debt-free

“Our early response to the COVID-19 pandemic has resulted in significant reductions in our operating cost structure and lower G&A expense, all while maintaining our debt-free balance sheet,” said Ryan Oviatt, Co-CEO and CFO of Profire Energy. “These efforts continue to be outweighed by lower demand and global consumption of oil and gas, combined with lower commodity prices due to a supply imbalance in the markets. However, we remain hopeful in our ability to find new and innovative ways to continue to drive long-term shareholder return.”

Third Quarter 2020 Financial Results

Total revenues for the period equaled \$4.0 million, compared to \$4.4 million in the second quarter of 2020, and \$9.9 million in the same period a year ago. The third quarter’s results reflect the continued impact of COVID-19 on consumer demand, as well as a 27% drop in the average oil price during the same period, due in part to excess supply in the market from global producers.

Gross profit was \$1.5 million, compared to \$2.1 million in the second quarter of 2020 and \$5.2 million in the year-ago quarter. Gross margin was 38.0% of revenues, compared to 47.9% of revenues in the previous quarter and 52.2% of revenues in the third quarter of 2019. The sequential gross margin decline was primarily related to product mix and related reserves, and the significant decline in revenue pushed the fixed cost impact on costs of goods and services above historical levels.

Total operating expenses were \$2.8 million, compared to \$3.2 million in prior quarter and \$4.0 million in the same period a year ago. The sequential and year-over-year decrease reflect ongoing cost control measures in response to COVID-19 and the ongoing supply and demand imbalance within the oil markets.

Compared with the same quarter last year, operating expenses for G&A decreased 31%, R&D decreased 32% and depreciation increased by 30%.

Net loss was \$1.1 million or (\$0.02) per share, compared to a net loss of \$808,503, or (\$0.02) in the second quarter of 2020, and net income of \$921,748 or \$0.02 per diluted share in the same quarter last year.

Cash and investments totaled \$17.2 million at September 30, 2020 compared to \$18.6 million at the end of 2019, and the Company continues to operate debt-free. Capital expenditures for the quarter were \$152,000. Working capital as of September 30, 2020 was \$22.5 million, compared to \$22.9 million at the end of 2019.

“We remain highly focused on building our sales funnel, maintaining and strengthening our customer relationships, and most important, research and development in order to maintain our leading brand awareness and market share,” said Cameron Tidball, Co-CEO of Profire Energy. “We are assessing and analyzing the vast market and opportunity for combustion solutions that reside outside of our traditional market wherein we can leverage our world class burner management systems to serve a more diverse customer base.”
